

# Science Based Targets – why businesses are aligning their goals with science

Thursday 17th September 8:30 – 12:30 (latest)  
kindly hosted by SEB, Kungsträdgårdsgatan 8, Stockholm

As COP 21 in Paris approaches WWF and CDP invite you to a workshop on Science Based Target Setting.

Find out what a science based target looks like for your sector and consider joining the 50+ corporations globally which have already made a public commitment to set science based emission targets, using methodologies and guidance explained during the workshop.

Science Based Target Setting is an initiative that promotes innovative approaches to set ambitious and meaningful corporate GHG reduction targets that are consistent with the goal of limiting global warming to less than 2°C compared to pre-industrial temperatures. This initiative was formed as a response to the urgent call of the Intergovernmental Panel on Climate Change (IPCC) to scale-up the efforts to decarbonize the economy.

The first part of the workshop aims to inspire decision makers to consider setting science-based targets and to provide an overview of the topic. From 9.30 we will look go into more detail, looking into the methodologies and approaches available and how they can be applied to different sectors, with plenty of time for discussions and the chance to discuss your case with the experts.

The event is free of charge and is relevant for corporate, investor, NGO and public sector audiences. As spaces are limited, we will give priority to companies which might consider setting targets. Spaces for consultancy companies are limited.

## Program

- 8:30** Registration and coffee
- 9:00** The Big Picture: Science-Based Targets – demonstrating climate change leadership.
- 9:30** **Workshop format covering:**
  - The science
  - Model framework and blending model components
  - Choosing a method for creating a new target
  - Determining if a target is science-based
  - Eligibility criteria
  - Examples of targets
- 12:00** Close

Inspiration and overview,  
for decision makers and  
technical experts alike

Equip yourself with  
the knowledge to  
consider setting a  
target for your own  
organisation

Please [register here](#) to express your interest in attending.  
We will contact you to confirm your place by Friday 4th September.

### Warm welcome!
