

Science Based Targets initiative Business Ambition for 1.5°C Commitment Letter Version 1.3 - March 2021

- Organizations joining the Business Ambition for 1.5°C campaign of the Science Based Targets initiative (SBTi) and partners must follow the [SBTi step-by-step process](#) and align with SBTi criteria and recommendations.
- Please consult the [Business Ambition for 1.5°C Guidance and FAQs](#) document for additional information on the process and expectations.
- By joining the SBTi Business Ambition for 1.5°C, organizations are also joining the [UNFCCC Race to Zero](#)
- Please review this document in its entirety and fill in the table at the end.
- SMEs are welcome to join Business Ambition for 1.5 C and need to submit both the completed SBTi [SMEs Target Setting Letter](#) and this commitment letter.

I am pleased to confirm that [REDACTED] is aligning its climate mitigation targets with the most ambitious aim of the Paris Agreement and to what science dictates is necessary to reduce the destructive impacts of climate change on human society and nature: **to reach net-zero global emissions by 2050 at the latest in order to limit global warming to 1.5°C.**

By signing this letter and selecting one of the two options below, my organization commits to align its ambition with keeping warming to 1.5°C and reaching science-based net-zero emissions by 2050; by ticking both options, my organization is committing to the highest level of ambition in the short and long-term:

Option 1 – 1.5°C science-based emissions reduction targets: My company commits to set science-based emissions reduction targets across all scopes¹, in line with 1.5°C emissions scenarios and the criteria and recommendations of the Science Based Targets initiative.

Option 2 – Net-zero science-based emissions reduction targets: My company commits to a) set a long-term science-based target to reach net-zero value chain GHGs emissions by no later than 2050 and to b) set interim science-based targets² across all relevant scopes and in line with the criteria and recommendations of the Science Based Targets initiative.

¹ In line with the Science Based Targets initiative (SBTi) criteria, scope 3 targets are required when scope 3 emissions represent 40% or more of total emissions generated by the company.

² Interim science-based targets can be consistent with either of the two levels of ambition accepted by the SBTi: 1.5°C and well-below 2°C. If a company sets a long term net zero target and sets interim science-based targets in line with well-below 2°C, more aggressive emissions reductions will need to happen in the longer term for the company to meet its net zero commitment.

BUSINESS AMBITION FOR 1.5°C

Advocate for net-zero emissions

Transforming to a net-zero emissions economy requires coordinated action across all sectors of the economy supported by enabling policy frameworks. Companies signing this document commit to policy advocacy positions consistent with a 1.5°C future. Companies are urged to advocate at key international moments, and in the countries in which they operate and have influence, for supportive government policy and goals that will deliver a net-zero emissions economy by no later than 2050.

Science-based targets (SBTs) are targets that are set five to fifteen years into the future and that meet the [criteria and recommendations](#) of the SBTi.

Science-based net-zero emissions targets are longer-term targets - by 2050 at the latest. The SBTi defines the state of net-zero emissions for companies as reaching a state of no impact on the climate resulting from the organization's GHG emissions.

Reaching a status of science-based net-zero emissions implies the following two conditions:

- Companies must attain a level of minimum emissions in the value chain through a series of science-based targets consistent with the depth of abatement achieved in scenarios that limit warming to 1.5°C with no or limited overshoot.
- Companies must neutralize the impact of any source of residual emissions that remains unfeasible to be eliminated by permanently removing an equivalent amount of atmospheric carbon dioxide.

More details can be found in the [Business Ambition for 1.5°C Guidance and FAQs document](#) and the [SBTi Net-Zero webpage](#). For financial institutions, the approach to net-zero emissions targets across the value chain will be further developed.

Sign the commitment

Please fill in and sign this document and return a signed copy to the SBTi Corporate Engagement team at: commitments@sciencebasedtargets.org. The SBTi reserves the right to carry out due diligence reviews before accepting and publishing commitments.

This SBTi commitment letter can be signed by C-suite level executives however, we ask you to please provide the contact details of a managerial level point of contact in the organization in the information table.

Once this commitment letter is processed and you have received a formal confirmation over email, your company will be recognized as "Committed" on our website and the partner websites of UN Global Compact and We Mean Business. Additionally, your organization will be added to the UNFCCC Race to Zero Campaign.
