should have an approved SBT in place. This plan will be integrated into the board-level initiatives of each company.

PCI Holding VI AB will provide support to portfolio companies in enhancing their GHG reporting and goal-setting. For instance, this involves developing a GHG calculation tool with the assistance of external consultants. Additionally, PCI Holding VI AB will foster knowledge sharing and transfer through its established sustainability network among the portfolio companies.

PCI Holding VI AB will include SBT as an evaluation criterion in new company acquisitions and assess the readiness of companies to set SBTs if they are not already in place. Companies without an approved SBT at acquisition will have to include a timeline for setting SBTs in their value creation plan.

PCI Holding VI AB selected these actions because it typically holds a majority ownership stake in portfolio companies, granting Procuritas significant influence. This allows PCI Holding VI AB to both mandate the establishment of SBTs within their portfolio companies and provide support through active board involvement and close collaboration with management.

PCI Holding VI AB strongly believes that measuring and target setting will result in real-world changes. PCI Holding VI AB has a significant opportunity to influence and support portfolio companies in this transition, a transition they might not have undertaken if PCI Holding VI AB hadn't actively worked towards it.

About the SBTi

The Science Based Targets initiative (SBTi) is a corporate climate action organization that enables companies and financial institutions worldwide to play their part in combating the climate crisis.

We develop standards, tools and guidance which allow companies to set greenhouse gas (GHG) emissions reductions targets in line with what is needed to keep global heating below catastrophic levels and reach net-zero by 2050 at latest.

The SBTi is incorporated as a charity, with a subsidiary which will host our target validation services. Our partners are CDP, the United Nations Global Compact, the We Mean Business Coalition, the World Resources Institute (WRI), and the World Wide Fund for Nature (WWF).
